

Noxudol[®]

Professional Rust Protection

Rust Protection Product Catalogue

ABOUT US

Auson's rust protection range for the automotive industry focuses on quality and environmental compatibility and includes solvent-borne standard products, high-solid products, products entirely without solvents, and water-borne products.

Auson was the first company on the Swedish aftermarket to launch a solvent-free range for underbody and inside cavity treatments for detailing centers. Auson's eco-friendly concept produces an emissions-free working environment that may not require special ventilation or permits and ensures better rust protection. Once rust protection treatment is completed, an odor-free vehicle is returned to the end customer.

The majority of vehicle manufacturers use products that contain no solvents or have a very low solvent content without forgoing the over-all quality of rust protection. Rust protection concepts are developed in close cooperation between customers and our laboratory.

For more than 20 years, Soken Trade Corporation professional staff and management team has been serving customers worldwide. Today we bring to you Noxudol the most advance and reliable line of products. We work close with our highly experience team of professionals and manufacturer to deliver the most unparallel top quality products and service to our customers.

We are committed on assisting you with a comprehensive portfolio of products and intended for your specific need and requirements

RUST PROTECTION

Professional and Reliable Rust Protection

The Noxudol range comprises everything from rust protection oils to underbody compounds and covers all interior and exterior rust protection needs. The rust protection range also includes consumer packs for do-it-yourself enthusiasts and smaller workshops. These products are also available as own brands.

Cavity Wax

Under Body Coating

	Under Body Coating	Cavity Wax
 SOLVENT FREE	 Noxudol 300	 Noxudol 700
 SOLVENT FREE (WATER-BASED)	 Noxudol 1100	 Noxudol 720
 SOLVENT BASED	 Noxudol 900 Noxudol 1600	 Noxudol 750

NOXUDOL 700

Noxudol 700 is a cavity wax free from solvents with high power of penetration. The material is intended for treatment of inside cavities, frames and underbody. Noxudol 700 was the winner in the British magazine Classic Monthly's test of corrosion protection product in 2013. The test was conducted over a 3 years period of time and it is the longest-running test of its kind of protective.

Available in:
500ML Aerosol Can
1 Liter canister
20 liter/5 Gallon Can
208 Liter/55 Gallon Drum (Available by request)

NOXUDOL 720

Noxudol 720 is a thixotropic, waterborn cavity wax that dries to form a soft grease-like film. The product is developed for customer with special demands for penetration and drip free 20 minutes after application. The material is intended for treatment of hollow spaces of motor vehicles but can also be used as transport and storage protection.

Available in:
1 Liter canister
20 liter/5 Gallon Can
208 Liter/55 Gallon Drum (Available by request)

NOXUDOL 750

Noxudol 750 is a chemically active anti-corrosive compound with low surface tension, based on mineral oil, waxes, rust inhibitors and solvents. After drying, it forms a waxy, moisture repellent surface. Because of the low surface tension, it possesses good penetrating ability as well as the displacement of any moisture that may be present. Noxudol 750 is intended for treatment of the hollow spaces of motor vehicles. However, it can also be used for the protection of iron and steel plates, beams, reserve parts, wire, etc.

Available in:
500ML Aerosol Can
1 Liter canister
20 liter/5 Gallon Can
208 liter/55 Gallon Drum (Available by request)

NOXUDOL 300

Noxudol 300 is a rust preventive product free from solvents. Low viscosity binding agents and additives have been mixed with enable application at a low temperature. After application, the material forms a soft film hardening to a waxy anti corrosive protection. Noxudol 300 may also be used as transport and storage protection fro machins, machine parts, steel constructions etc.

Available in:

500ML Aerosol Can

1 Liter canister

20 liter/5 Gallon Can

208 Liter/55 Gallon Drum (Available by request)

NOXUDOL 900

Noxudol 900 is a thixotropic, chemically stablized product consisting of bitumen, waxes, rust inhibitors and solvents. The product offers preventive rust protection and a reliable abrasion protection. The product is also water and moisture reppeliant and is effective against road salt. It is especially composed for car underbody and wheel arches. Noxudol 900 is also suitable for long time outdoor storing of industrial products.

Available in:

500ML Aerosol Can

1 Liter Canister

20 Liter/5 Gallon Can

208 Liter/55 Gallon Drum (Available by request)

NOXUDOL 1100

Noxudol 1100 is a waterborn abrasion protection for underbodies along with car wheel arches with excellent anti-corrosion properties. The material has very good adhesive properties and is hardwareing. Depending on the surface, the product is applied with a brush or a spray in an even layer to create a dry film. After drying, it forms a solid and elastic film. The dry film protects against damages caused by flyiing stons, ice and other mechanical ware.

Available in:

1 Liter canister

20 liter/5 Gallon Can

NOXUDOL 1600

Noxudol UM-1600 is a highly thixotropic, fiber-reinforced product. The product comprises bitumen, waxes and low aromatic solvents. A thicker layer also produces a good sound damping effect. The material is intended as abrasion and corrosion protection where extra effective protection is required. After dryiing, it forms a solid and elastic film.

Available in:

1 Liter Canister

20 Liter/5 Gallon Can

RENOX MILLIO 10

A vegetable ester-based alkaline degreaser for removing oils or grease from surfaces. Also contains tensides, complexing agents, and water. This product is entirely without solvents and is biodegradable. This product can also be used to clean spray applicator for Noxudol 300, 700, 1100, and 720 user.

NOXUDOL COLD DEGREASER

Effective petroleum-based degreaser containing de-aromatised white spirit and emulsifiers. The emulsifying additive included in the product is biodegradable, which is important from an environmental perspective. This product does not damage paint or metal surfaces. Highly recommended for user of Noxudol 900, UM-1600 and 750 to clean spray applicator.

NOXUDOL ZINC

Anti-corrosion primer for cars, boats and the home. Provides the same kind of rust protection as hot-dip galvanization. Used to treat surfaces of iron and steel, welded seams, cut ends, and galvanized materials. Contains more than 90% zinc.

ACTION 4

Universal oil that loosens and counteracts rust. Is water repellent and protects against moisture. Loosens deposits on all types of electrical contact. Thaws and lubricates frozen locks. Does not damage paint, plastic or rubber. Free from acid, sulphur and alkalis.

EQUIPMENT

RA/1 SPRAY GUN

Spray gun designed for the application of soundproofing, gravel protection and bituminous/wax-based rustproofing and undercoating. The gun has a threaded collar which allows for direct attachment to the product canister. This gun is equipped with an aluminum suction plunger.

A choice of optional plastic wands (shown at the bottom of this page) are available. The Undercoating Wand (item RA1 UCW) may be helpful in the application of undercoating in hard to reach places, i.e. behind mufflers and around exhaust pipes. The Rustproofing Wand (item RA1 RPW) will atomize the rustproofing in hollow beams, cavities and inside doors.

RUSTPROOFING GUN (WAX2)

Professional Rustproofing gun designed to apply protective coatings inside doors, beams, rocker panels and other cavities. This gun allows for pressure to build up inside the tank. This pressure will assure that the coating will be atomized at the tip of the wand and provide total coverage of the rustproofing inside the cavity. This all metal gun was built for industrial use by body shops, car dealers and undercoating professionals.

The gun is delivered with a brass spray tip to spray directly out of the gun and two spray wands that can be attached with a quick coupler. The mist wand is 5 ft. long, the hand held (90°) wand is 30 inches long.

Not recommended for application of undercoatings.

EXTENSION INCLUDED:
1. Mist wand
2. Hand held wand
3. Aerosol fast coupling nozzle

LEMMER SPRAY SYSTEM

Lemmer spray system is perfect for businesses who want professional results. The system is economical to purchase, and very easy to use and maintain. The RP-460 HD gun atomizes the material by mixing air with the product in the gun's spray head. The wands included with the system have a variety of angles and fan shapes for general applications.

The kit includes RP-2Q two quart system with RP-460HD Gun, extra canister for cleaning and cleaning brush kit.
