

Noxudol UM-1600

Highly thixotropic under body coating

General

Noxudol UM-1600 is a highly thixotropic, fiber reinforced product, based on bitumen, waxes and low aromatic solvent.

Range of application

Noxudol UM-1600 is a durable anticorrosive to be used under the fender, wheelhouse and on the remainder of the underbody, where extra effective protection is required. When applied in thicker layers it also provides a good sound damping effect.

Instructions for use

Apply with airless high-pressure spray equipment to the vehicle underbody and wheelhouse. It may also be brushed on. This product is designed for warm application.

Technical data

Consistency:	high thixotropic
Colour:	black
Density:	1040±50 kg/m ³
Dry content:	76 ± 3 %
Flash point:	40° C
Inflammable product:	class 2 b
Solvent:	white spirit
Aromatic content of solvent:	3 %
Rec.film thickness:	1.0 - 2.5 mm
Suitable application temperature:	15-25° C
Removable with:	white spirit or degreasing compound.
